## Puffin PROTECTORS: Scientists spent last summer counting puffins to see how they are responding to climate change

### Contents

[TREKKING NORTH](#)[SNACK TIME](#)[A CALL TO ACTION](#)[FINDING MEAN, MEDIAN, AND MODE](#)[YOUR TURN](#)

American Accent

They call themselves "puffineers." This group of intrepid researchers trekked to the northernmost point of Scotland last May to count puffins. Their goal: to see how the puffin populations are doing in the face of **climate change**.

After years of being a species of least concern, puffins were upgraded to vulnerable in 2015 -- the first step on the way to an endangered species. The Royal Society for the Protection of Birds estimates that puffin numbers across the U.K. and Europe have plummeted in recent years.

But no one really knows for sure how much puffin numbers have decreased. The last full census of seabirds in the U.K. was in 2000. There have been occasional counts since then, but nothing that paints a clear picture of

# Puffin PROTECTO

Scientists spent last summer counting puffins to see how they are responding to climate change

The image shows a digital interface for a document viewer. On the left is a sidebar with navigation options like 'Detailed Record', 'PDF Full Text', and a table of contents. The main area displays a document titled 'Puffin PROTECTORS' with a large blue banner and a photograph of a woman looking at a coastal scene. On the right side of the document, there is a vertical toolbar with several icons. A red rectangle highlights three of these icons: an envelope (for email), a folder (for adding to a folder), and a document with an arrow (for export).

The icons on the right allow you to **Add the article to the folder** as well as **E-mail** or **Export** the article.

MODE

YOUR TURN

endangered species. The Royal Society for the Protection of Birds estimates that puffin numbers across the U.K. and Europe have plummeted in recent years.

But no one really knows for sure how much puffin numbers have decreased. The last full census of seabirds in the U.K. was in 2000. There have been occasional counts since then, but nothing that paints a clear picture of puffin health.

Enter the puffineers, who are part of the Project Puffin (UK), supported by Heritage Lottery Fund in Scotland. It brings together on-the-ground researchers, technology like GPS trackers, and citizen scientists to understand the threats puffins face. "It's a big fact-finding mission," says Georgia Longmoor. She's one of this summer's puffineers and a Ph.D. student studying animal communication at the University of Edinburgh in Scotland.
